· LAB TO LAND · KNOWLEDGE TO LIVELIHOODS · INNOVATION TO INDUSTRY ·

# Eight Thematic Tracks

### 1. Emerging Research and Innovations in Veterinary Clinical Practices

Advances in medicine, surgery, theriogenology, imaging and critical care that improve treatment of companion, equine, farm and wildlife patients.

### 2. Veterinary Diagnostics, Vaccines and Therapeutics

Point-of-care diagnostics, next-gen vaccines, AMR alternatives and ethnoveterinary remedies for faster, safer disease detection and control.

### 3. Current Trends in Advancing Livestock and Poultry Production

Nutrition, genetics, welfare and climate-resilient management that raise productivity in livestock, poultry, pigs, camels and equines.

### 4. One Health in Action: From Science to Field Impact

Tackling zoonoses, food safety and wildlife–livestock–human links through joint surveillance, outbreak response and biosecurity.

### 5. Smart Technologies for Animal Health, Production and Clinical Practice

Using IoT, AI, telemedicine, drones and GIS to monitor animal health, guide decisions and modernise dairy, poultry and animal husbandry.

### 6. Allied Life Sciences for Animal Health and Production

Biotechnology, fisheries, fodder, pharma, data science and forensics that support animal health, production and the environment.

### 7. Foundations to Farmer: Translating Veterinary Sciences to Farmers' Prosperity

Turning research into farmer income through livestock product processing, extension, sound policy and support for tribal livestock systems.

### 8. Open Theme: Young Scientist Award

Young researchers from any veterinary discipline present original work to an expert jury, competing for the Young Scientist Award.

# Partner with us
